

INTERACTIVE SERIES

HORIZON HI500UX

*Shown without custom grill

Leon's Horizon Interactive HI500UX speakers are handcrafted and built-to-order to match the exact width and finish of any display for videoconferencing or telepresence systems. These high-performance, vocally optimized speakers deliver powerful and versatile solutions for a variety of corporate and commercial needs—from traditional videoconferencing to more demanding HD presentations. By combining high fidelity sound and high definition video in one sleek cabinet, the HI500UX connects the audio experience directly to the video source, creating a more lifelike environment for real-time collaboration.

- Custom built to match the exact width of any display
- Accommodates industry standard videoconferencing camera manufacturers, including Cisco, Polycomm, Vaddio, Tandberg, Sony and others (custom-sized housings available on request)
- Easily mounts to articulating TVs or directly to the wall
- Connects any number of screens together for larger systems
- Includes provisions for ambient light and cable management
- Includes engineering support, 2D CAD and 3D visualizations
