

*HiFIT400UX shown without custom grill

Description

Leon’s patent-pending Interactive FIT™ is the first soundbar to combine high-fidelity audio with locally accessible storage for small form factor AV components like webcams, mini PCs, baluns, or compact amplifiers. And with a custom grill handcrafted to match the width of any display, the Interactive FIT creates a unified design aesthetic that provides the perfect finishing touch in any commercial space.

Applications

Huddle rooms | Small to mid-size conference rooms

Key Features

- High-fidelity, vocally-optimized audio featuring 4” ultra-thin woofers and 1” silk-dome tweeters
- Internal rack space accommodates small form factor AV components like webcams, mini PCs, baluns, or compact amplifiers
- Mounts directly above or below the screen
- Includes custom, hand-stretched grill to match the width of any display
- Optional front panel available for additional security
- Available with OTO MCA 200 modular control amplifier
- Handcrafted in the USA
